

LUTFI ALAMSYAH

React Native & Mobile App Developer

Depok, Jawa Barat, Indonesia | +62 8387 9926 883 | lutfialamsyah1003@gmail.com | [LinkedIn](#) | [Portfolio](#)

SUMMARY

React Native developer with 4+ years of experience building production mobile apps end-to-end, from feature development to secure, well-tested, high-performing releases. My work spans 6 production apps, including two live on the Apple App Store (Auto2000 Digiroom, DaihatsuKu), built alongside cross-functional teams including PM, PQA, and DevSecOps. I bring a full-stack foundation in PHP Laravel and Node.js, hands-on experience in native-level debugging, and a habit of using AI tools like Claude Code as a productivity booster — while staying the one who reviews and owns the final call on my own code.

EXPERIENCE

Frontend Developer (React Native) | PT Astra International Tbk

Oct 2022 - Present

- Built and maintain 6 React Native applications in production, including 2 public apps live on the Apple App Store, serving Astra International's automotive retail and internal operations divisions.
- Implemented Auto2000 Digiroom's customer journey (personalized homepage, catalog, checkout, and payment integration), a public digital showroom app for Toyota Indonesia, working closely with design, product, and backend teams.
- Implemented push notification flows via Firebase Messaging for distinct business cases - service booking reminders, discount/approval workflow alerts, and loyalty and promotional campaigns.
- Implemented security and reliability features across apps including SSL Pinning, OAuth2 authentication, and OTA updates to reduce release friction.
- Debugged cross-platform issues using native-level tooling (Xcode console logs on iOS, Logcat on Android) alongside JS-level debugging, and profiled app performance using React DevTools Profiler and Datadog Performance Explorer.
- Integrated analytics and monitoring tooling (GA4, Datadog, Sentry, Power BI Client) to track app performance, usage, and crash reporting across the app portfolio.
- Wrote unit and component tests with Jest and React Native Testing Library, and end-to-end tests with Maestro; distributed QA/internal test builds via EAS Build for the PQA team ahead of release.
- Worked within large, cross-functional squads - including Business Process Analysts (BPA), Product Quality Assurance (PQA), Product Managers, and DevSecOps engineers - following Agile/Scrum practices to translate business requirements into technical specs and ship features through a structured release pipeline.
- Used MobX State Tree or Redux Toolkit for state management across apps with complex, multi-screen business logic.
- Managed source control and release workflows using Git and TFS (Team Foundation Server) across multiple app repositories.

Selected Projects at PT Astra International Tbk

Auto2000 Digiroom - Public - App Store

Digital showroom app for Auto2000/Toyota Indonesia - browse vehicles, schedule test drives, and manage car service appointments.

Stack: React Native, TypeScript, Expo, Expo Router, Firebase (Geolocation, Messaging, Remote Config), SAP Emarsys, MobX State Tree, SSL Pinning, Axios, GA4, Datadog

DaihatsuKu - Public - App Store

Official Daihatsu Indonesia app for vehicle information, service booking, and customer engagement.

Stack: React Native, TypeScript, React Navigation, Firebase (Geolocation, Messaging, Remote Config), MoEngage, GA4, MobX State Tree, SSL Pinning, Axios, Sentry

Auto Intelligence - Internal Project

Internal analytics app for Toyota staff - discount approval workflows, sales analytics, and staff performance tracking.

Stack: React Native, TypeScript, Expo, Expo Router, Firebase Messaging, Power BI Client, OAuth2, MobX State Tree, SSL Pinning, Axios, Datadog

SmartApps - Internal Project

Internal asset management app including STO Asset, a QR/barcode-based asset tracking counter for Astra International.

Stack: React Native, TypeScript, React Navigation, Expo Camera, Realm, Firebase Remote Config, MobX State Tree, SSL Pinning, Sentry

Fullstack Developer (Prohire Programmer) | PT Waskita Karya (Persero)

Sep 2020 - Dec 2021

- Developed and deployed internal web and mobile applications to optimize company operations, managing the full stack with PHP Laravel (backend) and React (frontend).
- Built Smartopname (attendance data entry/management) and Harsa (construction cost estimation) using React Native, React Navigation, Redux Toolkit, and Axios.
- Built and maintained REST APIs consumed by both web and mobile clients, ensuring consistent data across platforms.

SKILLS

Mobile Development: React Native, Expo, Expo Router, React Navigation, TypeScript, JavaScript, SSL Pinning, OTA Updates, OAuth2 Authentication, Expo Camera, Realm, basic accessibility (a11y) implementation

Testing: Jest, React Native Testing Library (RNTL), Maestro (E2E testing)

State Management: MobX State Tree, Redux Toolkit

Frontend (Web): React.js, Next.js, HTML, CSS, TailwindCSS, Bootstrap

Backend: Node.js (Express, AdonisJS), PHP (Laravel, CodeIgniter)

Database: PostgreSQL, MySQL, Microsoft SQL Server, Realm (local/offline storage)

Analytics & Monitoring: Power BI Client, Google Analytics 4 (GA4), Datadog, Sentry, SAP Emarsys, MoEngage

Firebase: Cloud Messaging, Remote Config, Geolocation

Tools & Practices: Git (GitHub, GitLab), TFS (Team Foundation Server), EAS Build (QA/internal distribution), Docker, Figma, REST API integration, Agile/Scrum, CI/CD

AI-Assisted Development: Uses Claude Code and multi-model workflows (Hermes, 9Router across Claude and DeepSeek) as a productivity booster for faster development, debugging, and code review, while reviewing and owning the final call on own code

EDUCATION

B.S. Information System - Trilogi University | 2023 - Present | GPA 3.71

Diploma, Information Technology (Software Engineering) - CCIT Fakultas Teknik Universitas Indonesia | 2020 - 2022 | GPA 3.53

CERTIFICATIONS & AWARDS

- Certificate of Competence - Programmer, Indonesian Professional Certification Authority (BNSP) - Dec 2022
- 2nd Place, Programming Competition, STMIK AntarBangsa - Apr 2020
