PROFILE

I am an eager and resourceful Frontend Developer who thrives on building, deploying, and optimizing scalable digital experiences across web and mobile platforms. I actively seek out new technology and best practices, focusing on continuous learning to deliver high-quality, maintainable code

EXPERIENCE

Frontend Developer - PT Astra International Tbk Oct 2022 - Current

Functioning as a Frontend Developer with a sharp focus on high-impact mobile application development for PT Astra International. My role involves the **end-to-end implementation of user-facing features**, complex business logic, and seamless integration with backend services.

I was the primary developer for the full customer journey on our e-commerce platform, including the **personalized homepage, catalog, checkout, and payment integration**. This involved collaborating with other teams to turn business needs into **reliable React Native code**, with a constant focus on optimizing performance and user experience across all applications.

Fullstack Developer - PT Waskita karya (Persero) Sept 2020 - Dec 2021

Functioned as a Prohire Programmer, developing and deploying internal web and mobile applications designed to optimize company operations. **Managed the full stack for applications**, utilizing **PHP Laravel** for the backend and **React** for the frontend.

SKILL

Frontend Development

- HTML, JavaScript, TypeScript
- React (React JS, Next JS)
- CSS (Bootstrap, TailwindCSS)
- React Native

Database

- Microsoft SQL Server
- PostgreSQL
- MySQL

Backend Development
